

Interlaken Town Road Site Disturbance Agreement

A. Permit Required. A Town of Interlaken Site Disturbance Permit is required before any person or entity may landscape, excavate, grub and clear, grade, or perform any type of construction activity that will disrupt or cause a change in the natural landscape or increase impervious surfaces upon any parcel of property located in the Town. No excavating shall be done further than is necessary to place the lot on grade or for building a dwelling and/or garage. Excavation or saw cutting requirements and specifications are provided in a separate document.

B. Exemptions. The following activities are exempt from the permit requirements of this agreement:

1. Actions by a public utility, the Town, or any other governmental entity to remove or alleviate an emergency condition, including the restoration of utility service or the reopening of a public thoroughfare to traffic;
2. Actions by any other person when the Town determines, and documents in writing, that the actions are necessary to remove or alleviate an emergency condition;
3. Construction activities disturbing less than 200 square feet of land and surface area;
4. Residential landscaping and gardening activities disturbing less 100 square feet of land surface area;
5. Town of Interlaken capital improvement projects, provided that site disturbance control measures are included in the bid specifications and plans for the special improvement project.

C. Special Considerations. When residential landscaping and gardening activities disturbs an excess of 100 square feet of land, the town council may consider a waiver of some of the conditions listed below as requirements of the Site Disturbance Agreement. The applicant must apply for a waiver to the town council, and the council will consider the request as part of their regular business at a regularly scheduled town council meeting.

Refer to Title 09 “Building and Construction,” Chapter 9.05, of the Interlaken Town Municipal Code for more information about the site disturbance permit.

The applicant must agree to the following policies and conditions prior to Interlaken Town granting approval for their request to disturb the natural landscape or increase impervious surfaces upon any parcel of property located in the Town.

1. **Jones and DeMille Engineers** are the Interlaken Town Engineer and will review all permit applications and make recommendations to the Town Administrator, Planning Commission, and Council . No permits will be approved until the plan is reviewed and signed by Interlaken Town’s authorized representative.
2. A policy of liability insurance must be obtained by the applicant, naming Interlaken Town as coinsured, insuring against liability for property damage and personal injury in an amount not less than 1 million (1,000,000.00) which may result from road conditions created by the encroachment/cut. No road restoration permit shall be

issued until the policy, or a valid binder therefore has been delivered to the Interlaken Town Administrator.

3. The applicant will provide a site plan and engineering survey if grade of land being disturbed is over a 10% slope, must be submitted to the Interlaken Town Administrator. This is to ensure compliance with the Land Use and Building Ordinances of Interlaken Town.
4. The applicant agrees to conform to all Land Use and Building Ordinances of Interlaken Town and the requirements in this agreement.
5. The applicant agrees to complete a location request with Blue Stakes of Utah to identify existing underground utilities, including but not limited to, the Interlaken water system, that could be affected by work in the road right-of-way. Failure to do so could result in fines and repair costs.
6. The applicant will provide a suitable toilet on-site or will provide the workers access to the facilities in a home prior to the work beginning.
7. The applicant shall utilize appropriate traffic signs, markers, and procedures in all construction activities as defined on the approved traffic control plan and in the Federal "Manual of Uniform Traffic Control Devices".
8. A suitable closed trash container or dumpster will be on site as soon as the building phase begins to produce trash. All dumpsters and containers will be covered with a mesh cover (blanket) to prevent the spread of debris. The applicant is responsible for any trash that leaves the property due to wind or to negligence by the workers. **No construction debris is to be put in the community dumpster located at the Interlaken Town dumpster site on Luzern Rd . Per the Interlaken Town Ordinances, a \$500.00 fine will be imposed on the Property Owner for any violations.**
9. The Interlaken Town roadway includes a 33-foot wide right-of-way. Construction vehicles are subject to the parking regulations listed in Title 6 of Interlaken Town municipal code. Interlaken Municipal code prohibits parking within the town's 33-foot wide right of way from November 1st through March 31st. The Owner must advise contractors that their vehicles must be parked outside the 33-foot wide right of way during these months. The road right of way includes any shoulder areas that fall within the 33-foot width. Failure to comply with this ordinance will result in fines and removal of the vehicle at the registered owner's expense. When construction activity requires temporary blockage of the right of way, the town administrator must be notified a minimum of 48 hours in advance. Traffic measure controls must be in place during the blockage, with at least one attendant in place to help with directing traffic.

Any vehicle which is blocking more than 50% of the roadway surface, other than for temporary unloading of materials or if a notification was sent in accordance with section 9., will be considered in violation of the town's parking regulations and subject to penalties. Any vehicle which is moving through the roadway in a backwards fashion, blocking more than 50% of the roadway surface, and presenting a hazard to oncoming traffic, requires the presence of flaggers in front and behind the vehicle. Of special concern are dump trucks, concrete trucks, trailers, and other heavy equipment backing up into a blind spot section of roadway.

During April through October, when parking in the roadway is permitted, no construct site shall have in excess of 3 vehicles present. Vehicles must be parked with wheels off the asphalt surface, but may encroach on the shoulder areas, as specified in Title 6 of Interlaken code. Workers should carpool to the worksite to limit the number of cars parked to a maximum of 3. In the months from November through March, winter parking restrictions are in place and no vehicles may be parked in the 33-foot right of way, 24 hours a day, 7 days a week.

10. The applicant shall take precautions to prevent damage to the pavement and shoulder surfaces at all times. Paved and shoulder surfaces outside the work area shall also be protected. The operation of steel tracked equipment or the placement of steel outriggers/stabilizers in direct contact with the pavement surface shall be prohibited. To avoid unnecessary damage to paved surfaces backhoes and track equipment should use rubber cleats or paving pads. Any damage to the paved or shoulder surfaces shall be repaired to the satisfaction of the Inspector at the applicant's expense.
11. A Road Impact Fee and Damage deposit applies to projects that make significant use of the town's roads. The impact fee and damage deposit must be paid prior to the town's approval of the plans. Contact the Town Administrator to assess what fees and deposits are applicable. The deposit refund amount will be determined by assessing any damage to done to the town's road system, including, but not limited to, the asphalt surface, shoulder areas, guardrails, or any additional property located in the town's 33 foot wide right of way, as well as town signage, damage due to erosion and surface destabilization, movement of material located in the shoulder areas, and other damage inflicted on municipal property or personal property located within Interlaken caused by the construction effort. The deposit amount will be assessed and released once construction has completed and approved by Interlaken Town's authorized representative.
12. Environmental Control: a) Dust and debris will be controlled at all times. b) Noise will be kept down so as not to become a nuisance. c) Clean up will require the removal of all equipment, material, barricades and similar items from the right-of-way. Areas used for storage of excavated material will be smoothed and returned to their proper contour. The street will need to be vacuumed and/or swept in order to restore the surfaces and surrounding surfaces to their clean condition by the end of the workday. The applicant will be fined \$500.00 per occurrence for failure to keep the Interlaken Town Roads clear of debris.
13. New construction applications require a certified staked survey that is dated within 5 years of the application.
14. All road modification work will be completed by the completion date specified in this agreement. If the work is not completed satisfactorily by this date, the Town reserves the right to complete the work using it's own contract labor. The cost of this work will be deducted from the owner's road damage deposit along with a \$500 service fee.
15. Failure to Comply In the event of failure on the part of any person, firm, public utility, or corporation to comply fully with the provisions of Interlaken Town Ordinances, enforcement authorities of Interlaken Town are authorized to: a) Initiate

action by citation and/or proceed to forfeit bonds; b) Under conditions which create an immediate hazard to public health or safety, to require the responsible entity to immediately repair or remove the hazard from the right-of-way and require the responsible entity to bear all costs of the repair or removal plus 15%, or c) Under conditions which do not create an immediate hazard to public health or safety give written notice to the responsible entity to repair or remove such hazard from the right-of-way. Such notice may be served either by personal service or by mailing the notice to the responsible entity by registered mail and posting by copy thereof on such hazard for a period for 5 days. If such hazard is not removed within 5 days after the notice is complete, the Town may remove the same at the expense of the person, firm, or corporation and recover costs and expenses, and also liquidated damages in the amount of \$100 for each day the hazard remained within the right of way after notice was served and d) Immediately rescind any pre-qualification which may have previously been granted.

Please read and sign the agreement on the following page. See the **Interlaken Fee Schedule** for a list for fees and deposits for the site disturbance permit. Submit the agreement with a check made out to Interlaken Town for the Interlaken fees and deposits to:

Interlaken Town
P.O. Box 1256
Midway, UT 84049

Please contact the Interlaken Town Administrator at admin@interlakenut.gov or (435) 565-3812 if you have further questions.
